

Whole House Water Treatment

Multi-Pure's Whole House Water Treatment Systems are designed to aesthetically improve the quality of the water used throughout your entire home by doing the following:

- ✓ Provide cleaner, better smelling water for all household uses: bathing; showering; laundry; dishwashing, etc.
- ✓ Provide clean, clear water at every tap and appliance throughout the home.
- ✓ Reduce chlorine, bad tastes, and odors.
- ✓ Minimize rust in the water and stains on fixtures and clothing.
- ✓ Reduce dirt, algae, and large particulate matter.
- ✓ Leave-in the healthful dissolved minerals.

TWO MODELS AVAILABLE

Model TO30000 Capacity 30,000 gallons

Multi-Pure's **TO30000** comes with dual canisters, brackets and a BYPASS kit, plus two additional filters, for a total of four filters. Recommended for larger homes with more than two bathrooms

The **TO15000** is a single canister unit that comes with a bracket and two extra filters giving you a total of three filters.

Model TO15000 Capacity 15,000 gallons

Benefits and Features

- ▶ Durable polypropylene housing; high impact and corrosion resistant.
- ▶ Initial purchase includes additional filters (see above).
- ▶ Installed on the main water supply for treatment of all the water on one system.
- ▶ Uses the exclusive Multi-Pure high-volume carbon filtering element.
- ▶ High flow design with high volume capacity (max. pressure 90 psi).
- ▶ May be used for both residential and commercial applications.
- ▶ Designed to be the most effective on municipally treated water.
- ▶ Easy Filter Replacement when installed with bypass kit (optional on TO15000).
- ▶ Operates on water pressure only.
- ▶ Outstanding Customer Satisfaction Guarantee.
 - 90 day money-back guarantee
 - 1 year warranty on all accessories
 - Lifetime warranty on housing**

** Provided that the filters have been changed at least once per year.

*Filter Life

*The life of the filter will vary depending on the amount of water used and the level of particulate matter in the water processed. It is recommended that the filter be replaced at an interval of every three to six months.
